DETAILED ACTION

Acknowledgements

1. This office action is in response to the reply filed on 5/1/2006.
2. In the reply, the applicant amended claims 8 and 10 and added new claims 56 and 57.
3. Thus, claims 8-12 and 56-57 are pending.

Claim Objections

4. Claims 1-5 in the reply objected to because of the following informalities: claims 1-5 should be numbered 8-12 instead of claims 1-5. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 8, 56, and 57 recite the limitation "the disposable cassette" in lns 13, 13 and 12 respectively. There is insufficient antecedent basis for this limitation in the claim. The examiner recommends changing "the disposable cassette" to read "the disposable unit" as is used elsewhere in the claims or to change all recitations of "the disposable unit" to read "the disposable cassette."

Allowable Subject Matter

7. Claims 8, 56, and 57 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 3767

8. Claims 9-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter: The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found was an enclosure removably accepting a disposable cassette for flowing fluids through a disposable dialysis unit and an infrared heater having an emitter, a housing enclosing the emitter with an opening configured to face the disposable unit, an infrared transmissive material covering the opening, and a infrared reflector positioned opposite to the infrared emitter such that the disposable cassette is between the emitter and reflector wherein the infrared energy from the emitter is substantially directed toward the infrared transmissive material in combination with the other elements in the claims.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3767

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
